RCC and Bowhead Partner to Highlight Career Opportunities for Students

Rappahannock Community College (RCC) has partnered with Bowhead's Dahlgren Program Management Office (PMO) to introduce career opportunities for students. Recognizing RCC as a leader in education and training, Bowhead's goal is to introduce students to available career options, locally, remotely, and across the country. Bowhead's Dahlgren PMO is located on Dahlgren Road in King George, near their main customer, Naval Surface Warfare Center Dahlgren Division (NSWCDD).

Students are invited to join RCC's College Navigation team in the lecture hall at the Warsaw campus or virtually, as we host Brian Grant, Human Resources Recruiter, and Gabriel Stewart, Deputy Program Manager of NSWCDD V-Department Operations Support (V Ops) contract, on 23 February 2023 at 12:30pm to 2:30pm. The event will include more about Bowhead's capabilities and benefits, including tuition reimbursement, current and future career opportunities, and provide the opportunity to answer any questions students or faculty may have. To receive the Zoom link, please contact Kelly Osuanah at kosuanah@rappahannock.edu.

Bowhead's vision is to be the premier technical and professional service provider, manufacturer and products supplier, known and recognized for their quality, efficiency, and commitment to those they serve. The Dahlgren PMO currently performs 14 prime contracts that support NSWCDD, Department of State, Defense Contract Management Agency (DCMA), Washington Navy Yard, US Coast Guard HQ, and other government customers.

Bowhead provides a wide variety of services, leading to career opportunities including program management support, financial management support, weapon systems development and testing support, engineering prototype fabrication support, and more.

To learn more about Bowhead, please visit their website Bowhead.com and check out current job openings at [Bowhead Careers | iCIMS](#).

For immediate questions, please reach out to brian.grant@bowheadsupport.com.
