

# How to Use Zoom on a Mobile Device

There are two ways to access Zoom from a mobile device. One way to access Zoom is with the **Zoom App**, and the other way to access it is via the **Zoom tile** on the **myGCC homepage**.

## From the Zoom App

The Zoom app can be downloaded on both Apple iOS and Android phones. The following steps demonstrate how to download and log into the Zoom app.

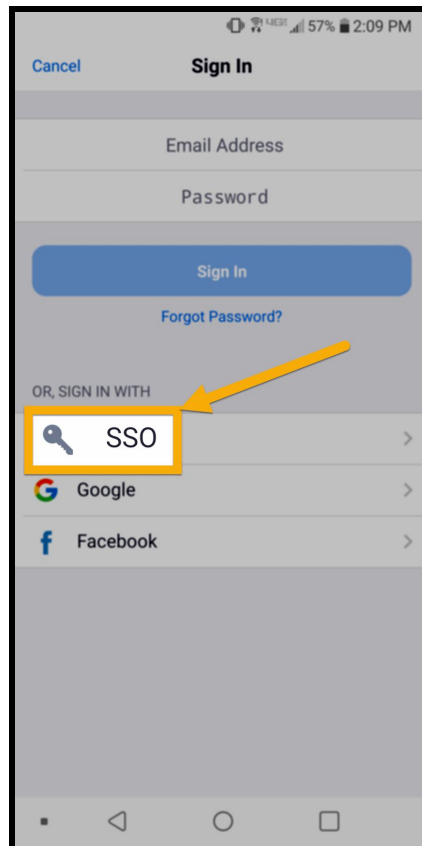

1. Open the app store on the mobile device and search “Zoom.” Then, download the app to the mobile device. Another way to download the Zoom app is to click the Apple App Store or Google Play buttons below. These images will be redirected to the proper app store for the Zoom download.

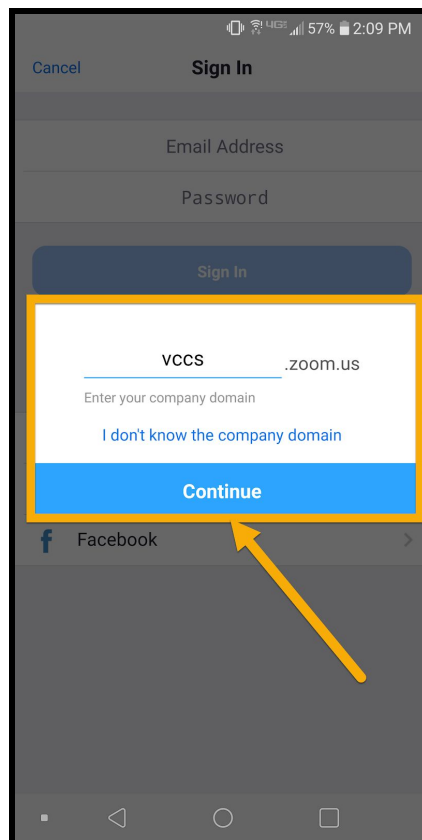

2. Open the Zoom app and tap the “Sign In” button at the bottom.

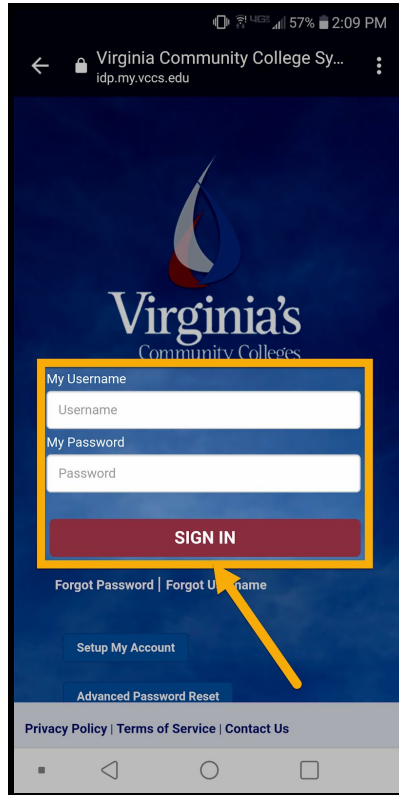

3. Select “SSO”, which stands for “single sign-on.”

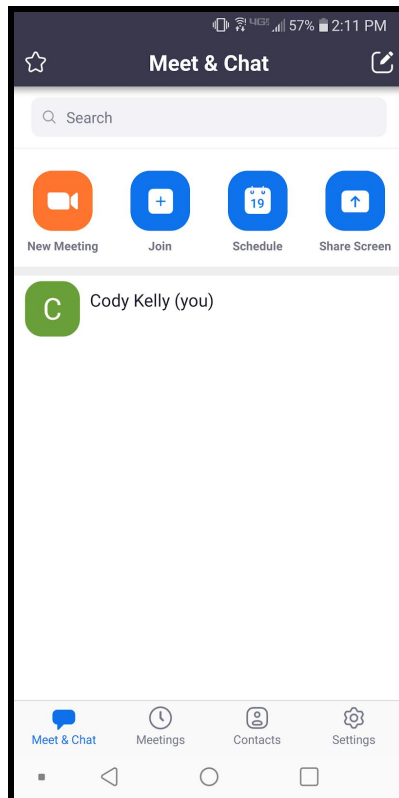

4. Enter “VCCS” as the company domain, and select **continue**.

5. Login with your **myGCC** information.

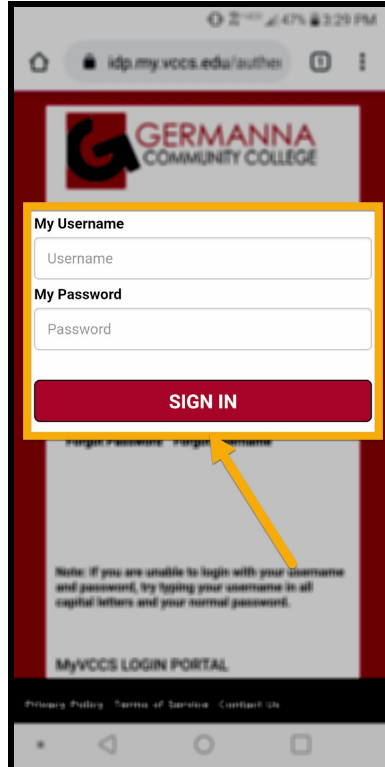

6. An example of the main screen for the Zoom mobile app is included below.

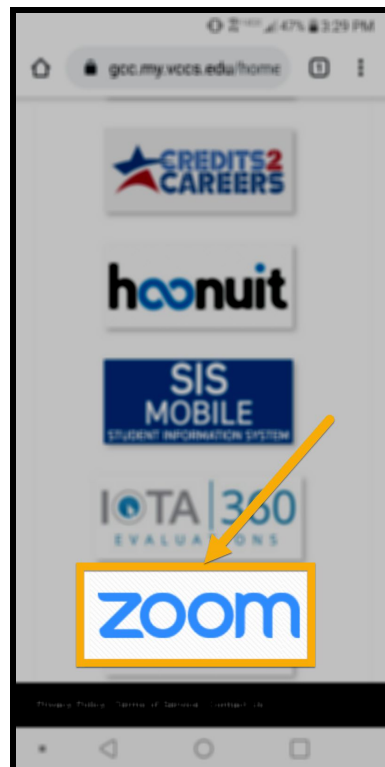

## From the myGCC Zoom Tile

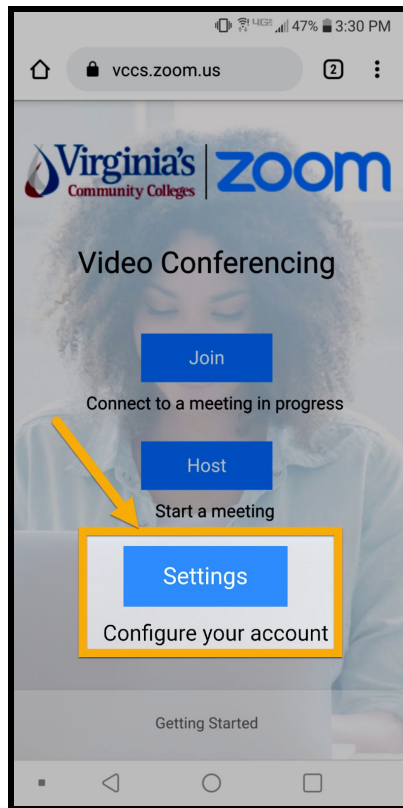

1. Go to the [myGCC login](#) page, and enter your myGCC credentials. Then, select “Sign In.”

2. Scroll down to select the “Zoom” tile.

3. Select "Settings."

4. Below is an example of the Zoom homescreen:
